

**livecookintable®**

## Introducing our new livecookintable® AR App

At MEC2, we want to forge a connection between the physical world and the digital world. Our team has worked extremely hard to create a first to market app that uses Augmented Reality (AR). Build and view your buffet lines instantly, in true size and most importantly, in your preferred locations.

# Build efficiencies Boost revenue

Thanks to the latest update you can now;

- effortlessly test and create your buffet line and see it life-size in your function area, or in 3 different virtual rooms.
- share your newly created buffet line with your banqueting team to ensure error free set-ups.
- Empower your sales team to show prospective clients their very own customized set up.
