Battery Cart

The MEC2 Battery Cart offers a completely self-sufficient power supply for normal devices with a Schuko plug, as well as for three-phase devices with 16 CEE connections. With around 15 kilowatt hours, the battery cart is sufficiently dimensioned to cover a complete buffet operation or even live cooking over the entire service period.

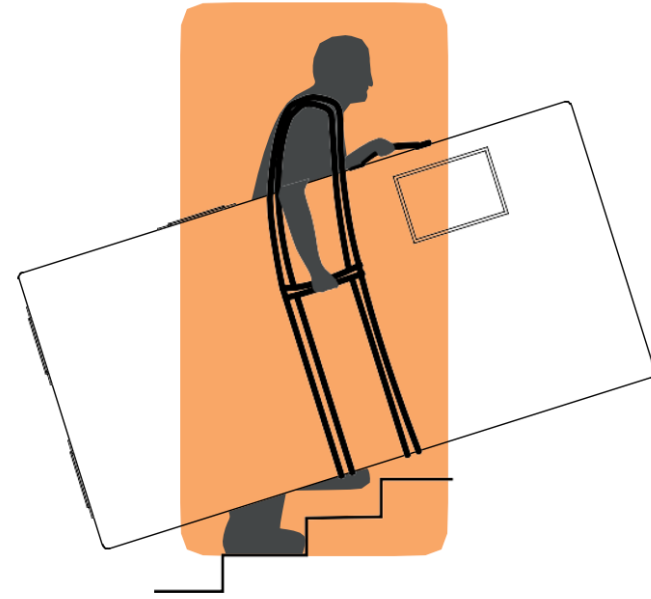

Compact design

USP livecookintable® :

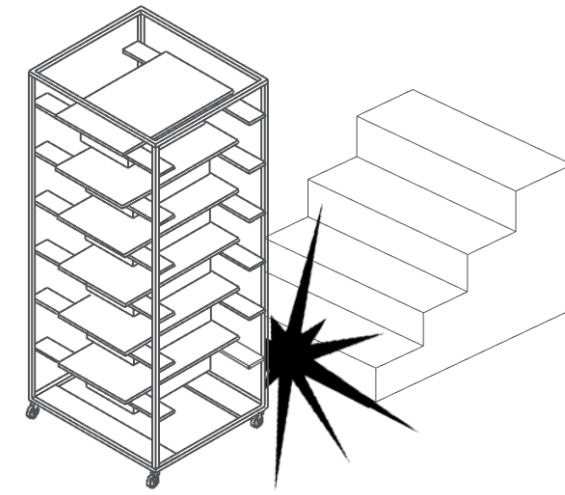

- space-saving transport with the carrier bags
- low weight can also be handled by one person
- compactly transportable:
1 table only 1 equipment trolley,
while competitors have
3 trolleys for 1 table

Compact design

USP livecookintable® :

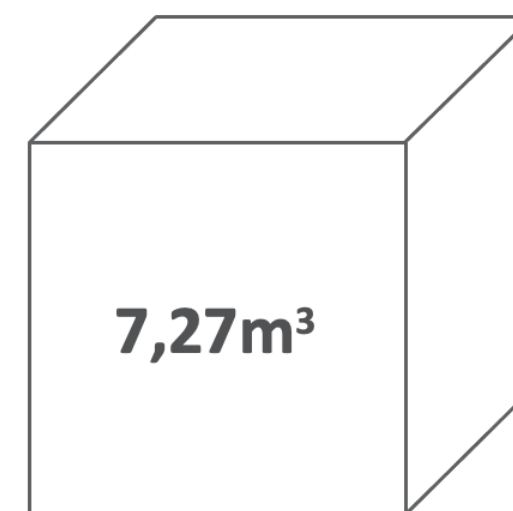

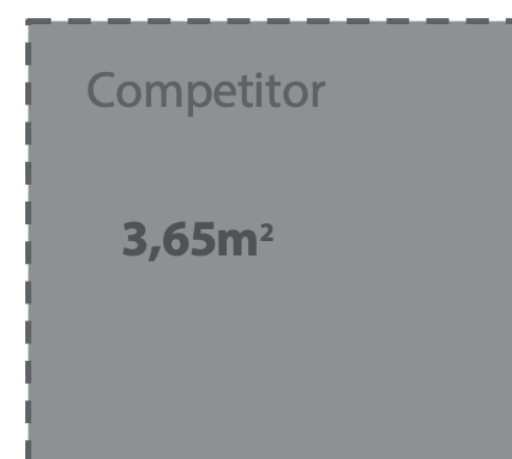

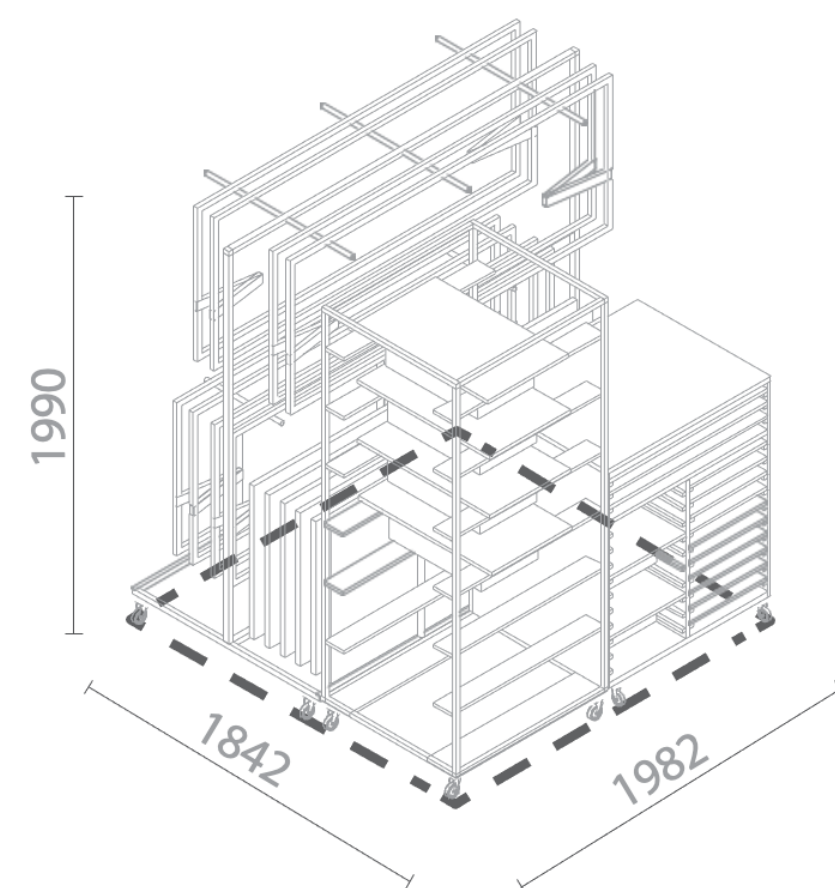

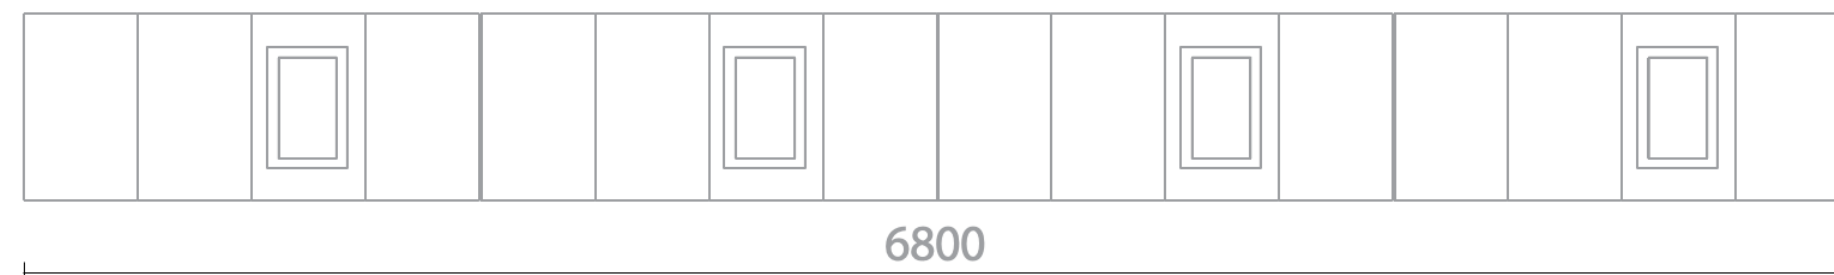

- comfortable, ergonomic and easy transport due to the bags
- handles make it easy to pack and lift

livecookintable® : Buffet line – 4 tables

Competitor: Buffet line – 4 lines

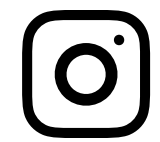

Minimum space

USP livecookintable® :

- 53% less storage space required for a 15% longer buffet than competitors
- 73% less storage volume required for 40% more working space than our competitors
