

StableTable[®]

"No more wobbly tables!"

STABLE TABLES, A PROFITABLE CONCEPT.

Wobbly tables, folded napkins under table legs, difficult adjustment screws and irritated guests are all but a memory. StableTable® is a new, patented, solution which automatically adjusts the table to any uneven surface. Regardless of where you place a table from StableTable®, it will always find a steady position.

No added weight is needed. On the contrary, the light tables can easily be moved around to create extra or differently arranged seating. Make the best use of the seating area, while reducing both the number of working hours and broken glasses!

StableTable® is a fully automatic mechanical patented system with two self-adjusting legs.

The unique self-stabilizing system sits well protected inside the centre pillar away from dirt, rain, snow and other external influence. No need for service or maintenance.

The legs automatically adjust to both grooves and bumps and manage height differences up to 25 mm and works equally well on cobble stone, tiled or uneven floors, indoors and outdoors. With no need to push, pull or force into place the tables self-adjust even when guests start moving the table around.

The problem with wobbly tables exists everywhere, both indoors and outdoors. It is obvious on cobble stones or paved areas, but can be equally frustrating on tiles or wooden floors.

Having to adjust wobbly tables and not being able to freely arrange the seating area, is a waste of valuable time and reduces efficiency. StableTable® is a flexible solution which offers benefits in all environments, doing so with style and flair. The classic design of the patented base can be combined with any choice of table top to create a welcoming and unique atmosphere.

PROBLEM SOLVING.
EVERYWHERE!

StableTable® opens a world of possibilities when it comes to furnishing, design and ambience.

The unique solution is hidden inside the pillar and the table base comes in several heights, sizes and colours. Every StableTable® has the same unique stability and flexibility, whether you choose a bar table, coffee shop table, dining table or lounge table. Extra sturdy designs are available for use in particularly demanding environments.

SMART SOLUTIONS,
INCREASED FLEXIBILITY.

TABLE BASES

StableTable® tables are suitable for both indoor and outdoor use all year round. The tables are available in several different heights (bar/poseur, counter, dinner/café and lounge) and in several different sizes to fit all sizes of tops and a number of up to date colours.

The **StableTable® Classic™** is with its straightforward Scandinavian design the perfect table for different combinations of heights or sizes at any venue.

The **StableTable® Extreme™** in 316L stainless steel is created especially for tough and exposed environments but fits equally well in classic environments.

The **StableTable® Nouveau™** is a modern design-table steeped in tradition develop to suit in the modern Bistros or where history is part of the design.

The **StableTable® Rise™** is a clean-cut table base with straight upright lines for modern, edgy and trendy restaurants and bars.

For a complete overview of the product portfolio, please visit our website www.stabletable.se

FLEXCROSS OR FLIPTOP

StableTable® tables come as standard with our unique **FlexCross™** that absorbs table top distortion and absorbs micro-movements to keep tops sitting tight and is fitted with our **EasyLock™** system. Or they can be delivered with our **FlipTop™** folding mechanisms that can be fitted with our Hook & Handle accessory kit that adds hooks for handbags and a carry handle that also doubles as a loop for a safety wire.

TABLE TOPS

The unique, patented StableTable® base can be fitted with any type of table top irrespective of type, shape or quality to create a unique design and atmosphere. There is an unlimited choice of new table tops – or buy the stand on its own for use with existing tops.

StableTable® OnTop™ Compact Laminate is our range of high quality compact laminate (HPL) table tops for in- and outdoor use.

For more information on the OnTop™ collection, please visit our website www.stabletable.se

PROFITABLE

StableTable® is a simple and smart investment which quickly pays for itself. More seats generate more income. With StableTable® it becomes easy to optimise the use of your seating area in a flexible manner. You will attract and satisfy more customers at a lower cost, and free up time to care for them.

ENVIRONMENTALLY SMART

StableTable® bases are manufactured in an ISO 14001 and 9001 certified factory in Sweden. This makes for short transport distances and efficient deliveries all across Europe. StableTable® tables are produced from partially recycled metal. All packaging material is FSC-certified and our products are all fully recyclable and produced to the highest quality standards, according to the Scandinavian design tradition.

EASY TO WORK WITH

The smart solution, with its self-adjusting system, makes StableTable® easy to work with. Re-arrange a table for four, into two tables for two, in seconds. Add or move a table without ever having to adjust it. Levelling screws, folded napkins, wobbly tables and complaining customers are all history!

UNIQUE FUNCTIONALITY

The StableTable® base has one fixed and one movable pair of legs. The mechanical system, placed protected inside the centre-pillar, regulates the movement of the legs. As soon as the table stands with all 4 legs fixed on the ground and in a stable position, the legs will automatically lock. Then every time the table is lifted, the legs will unlock and the table automatically adjusts to its new position.

StableTable® Classic

When performance meets innovation

StableTable® Classic is a self-stabilising table designed to work in all types of venues from lovely AI fresco areas to busy food-courts. No more wobbly tables!

The table design follows the traditional cross-leg shape and fits just as well with a small café size table top as a large size dining top.

With its full range of heights and sizes the StableTable Classic product family gives you the flexibility to design according to your needs and dreams.

The patented StableTable® technology that sits well protected inside the table, automatically adjusts to both bumps and grooves and manages height difference up to 25 mm. Use StableTable® Classic wherever you want, on any type of uneven ground, outdoors or indoors. Even if guests start moving the table around, you will never again have a wobbly table!

StableTable® Classic at the Opera, Stockholm, Sweden
When Swedish innovation meets world-class performance, something extraordinary happens and a new design classic - solving real problems - is born

Design concept and benefits

StableTable® Classic™ table bases are available in several different x-leg lengths for all sizes of table tops. They fit just as well in the patio of a luxury hotel as in a modern bistro or food court where tables are moved all the time. The large tables are also popular at care homes and canteens thanks to the extended legs and larger top-cross which provide ultimate stability.

StableTable® Nouveau

When heritage meets innovation

StableTable® Nouveau is a self-stabllising design table steeped in tradition.

With its soft curves, understated Scandinavian appeal and updated contemporary lines, the new table stands out as a design classic.

The concept has been developed to meet the aesthetic needs of modern cafés, bistros, bars and restaurants. True to our Swedish design heritage, form goes hand in hand with functionality. The softly curved legs stand firmly in place thanks to the unique, patented StableTable® technology inside.

StableTable® Nouveau automatically adjusts to both bumps and grooves and manages height difference up to 25 mm.

Just lift and place the table wherever you want, and it will immediately set all four feet on the ground and stop all the wobble even if

StableTable® Rise

When vision meets innovation

StableTable® Rise™ is a self-stabilising design table crafted in modern ambition.

With its cut, triangular legs, forward thinking approach, and straight modern Swedish lines, StableTable® Rise™ reaches new frontiers.

The design has been crafted to meet the needs of the modern minimalists that push limits and know exactly what they want. True to our Swedish design ethos, form goes hand in hand with functionality. The straight confident upward reaching table stands firmly in place, thanks to the unique, patented StableTable® technology inside.

StableTable® Rise™ automatically adjusts to both bumps and grooves and manages height differences up to 25 mm.

Just lift and place the table wherever you want, and it will immediately set all four feet on the ground and stop all the wobble even if guests start moving the table around.

StableTable® Rise™ at Bosco verticale in Milan, Italy

When Swedish innovation meets innovative architecture in the capital of design, limits are challenged, and timeless furniture - solving real problems - is created.

Design concept and benefits

StableTable® Rise™ meets the needs of modern, visionary restaurants and bars looking for straightforward, clear lines to keep the furniture in tune with clean industrial architecture and design. With its light features and distinct lines StableTable® Rise™ helps create refined venues.

All StableTable® Rise™ bases can be delivered with FlexCross™ or FlipTop™.

StableTable® Extreme

When nature meets innovation

StableTable® Extreme is a self-stabilising, edgy table created for durability in all conditions.

With its square shaped cross-legs and rugged, unpolished marine quality stainless steel the Extreme stands out in any setting.

The table is perfect for use where nature is close, but works just as well in a heritage site or around the latest high-tech architecture in the city.

Built to last, the table is produced in Sweden in 316L quality stainless steel, and with its unpolished finish there is no shine or glare only a hint of history.

As all StableTable tables, functionality is key and the table has our own patented self-stabilising technology inside to ensure the table never wobbles.

StableTable® Extreme automatically adjusts to both bumps and grooves and manages height difference up to 25 mm.

StableTable® Extreme at Giant's Causeway, Ireland

When Swedish innovation meets Ireland's raw unspoilt nature, something mythical happens and long-lasting furniture - solving real problems - is created.

Design concept and benefits

StableTable Extreme is a versatile range of table bases fit for use in difficult external conditions but works equally well in high tech design areas. Produced in 316L Stainless steel the bases can be used next to salt water. And with its rugged and confident design the StableTable Extreme fits just as well in historic environments as in modern designs.

A clear glass wine glass is tilted, pouring a liquid (likely water or white wine) onto a white, smooth surface that represents a table top. The liquid is captured mid-pour, creating a dynamic splash. The background is a soft, out-of-focus white, emphasizing the clarity of the glass and the texture of the liquid.

StableTable® OnTop™ Compact Laminates (HPL)

StableTable® OnTop™ compact laminate is a complete range of high quality table tops. They are weather and UV-proof and suited for both in- and outdoor use, and 12mm thick for extra strength under high wear usage. Available in a range of standard sizes and colours to fit most venues.

NaturalFeel™ is our own unique range of compact laminate tops with textured surfaces that make the table top feel like the real material. All our tops in the NaturalFeel™ range are laminated with the same material on both upper and under side and have colour matched cores for an even more exclusive feeling.

Produced to withstand most they all come fitted with double threaded inserts to ensure they stay in place.
