

StableTable[®] - Freedom to design!

StableTable[®] are the Swedish table bases that never wobble. No adjustable feet that always needs to be re-adjusted, no folded napkins under the table legs, no more spilt drinks and no more complaining quests. Automatically the table adjust to any uneven ground both in and outdoors. StableTable[®] is internationally recognized and awarded as "the" solution to problems with wobbly tables.

Change to StableTable[®] and forget about wobbly tables forever!

- Automatically self-adjusting
- Manages bumps and grooves
- Manages height differences of up to 25mm
- Fully locking system
- Mechanical system that sits well protected inside the centre pillar
- Simple but ingenious mechanical system – no valves, no bladders, no oils
- Not impacted by weather
- Works equally well both in- and outdoors
- Produced in our certified factory in Sweden
- Fully recyclable

End the frustration over wobbly tables and stop wasting time and money.

Studies show that more than 3 minutes are spent per table per day on each wobbly table - with 20 tables that is 6-7 hours per week. Time the staff spend unnecessarily; re-adjusting feet, wiping of spilt drinks, picking up folded menu cards under table legs and listening to complaining quests. This adds up hundreds of Euros "wasted" every week!

Abbey Hotel with Allium Restaurant, Bath, UK
